

I am supporter of family programming, which is heard on FM translators. This type of programming allows my family to hear music which does not contain profane language and ideas. If the programming is replaced by Low Power FM, the chances are strong that our family will not be able to continue to enjoy Christian Rock. I am asking that you keep family values in mind when you consider switching to this LPFM. Alternative christian radio is strong, even though it is supported solely by the people and not advertisements. Please allow the FM translators to continue to broadcast music which is supported solely by people like me, not corporate advertisements. Thank you.
